

Sustainability Assurance Programme

Turning sustainability commitments into verified, compliance-ready action

Clear data, credible assurance, compliance-ready solutions.

Intertek Sustainability delivers trusted, end-to-end solutions across our ATIC services, helping organisations achieve measurable impact and long-term value through science-led, industry-specific expertise.

Across global supply chains, sustainability expectations are rising fast. Progress must be demonstrated through reliable data, verified performance, and recognised frameworks that align with buyer and regulatory requirements.

18%
GDP Annually

environmental risks continue to place a significant burden on Bangladesh's economy

272K+
premature deaths

linked to pollution and environmental exposure across air, water, and sanitation

Why it matters

Verified sustainability performance is now essential to manage risk, meet regulatory and buyer expectations, and support resilient, responsible operations.
